```python
In [1]:  #break = used to terminate the code
         #continue = skips to the next code
         #pass = does noting,acts as placeholder
         while True:
             print('hello')
             break
```

hello

```python
In [2]:  #as we see the loop stop cuz fo the break
         while True:
             name = input('enter your name:')
             if name != '':
                 break
```

enter your name:
enter your name:
enter your name:
enter your name:Aziz

```python
In [5]:  phone_number = '123-456-7890'
         for i in phone_number:
             if i== '-':
                 continue
             print(i,end='')
```

1234567890

```python
In [6]:  #now continue skips the code print(i) and return to thr for loop
         for i in range(1,21):
             if i==10:
                 pass
             else:
                 print(i)
```
